

HedgeHog⁴N

SKU# HOG025

A new breed of Hog!

The Hog range just got broader. HedgeHog 4 Network™ is the littlest of the range and still packs quite a punch running the same software as all the other Hogs. HedgeHog 4N™ comes with ArtNet and CIP capabilities and is designed for small to mid level shows. It's compact, lightweight and easy to take on a plane!

Running on Linux, it's fast, stable and ready to Hog. Whether being used in a school theatre, nightclub, corporate event, medium scale rental job or church, it's the perfect console. Retaining the same programming layout as its larger brother, the Road Hog 4™, as well as being able to load showfiles from any of the range (and vice versa) means that this compact console is extremely flexible and easy to use.

HedgeHog 4N™ will, in addition to the above, make a perfect remote focus and dimmer city console, with its ability to network with the bigger hogs in the fleet!

FEATURES

Robust Hog 4 Operating Software

Use Any Hog 4 Show File in HedgeHog 4N™

(Hog 4, Full Boar 4, Road Hog 4, Nano Hog 4, HedgeHog 4)

Unlimited Number of Simultaneous Crossfades
