Command the heavens with Elation's **PROTEUS ATLAS**, built to deliver otherworldly light for large-scale productions and permanent outdoor installations. With 1 million LUX at 20 meters, LILI technology, and a massive 320mm lens, Atlas cuts through the sky with bold, focused beams that evoke the power of traditional Xenon fixtures.

Its onboard effects system sculpts light with gobos, frosts, and prisms—shifting seamlessly from piercing beams to layered textures and soft washes. With CMY color mixing and a 25-position color wheel, Atlas offers a rich palette for bold bursts, atmospheric moods, and everything in between.

The Atlas' precision motors provide smooth pan, tilt, and continuous rotation, while Elation's SkyMotion system enables synchronized patterns across fixtures without a console. Built and certified with an IP-66 rating, Atlas stands strong in any weather, making it ideal for concerts, cruise ships, and permanent outdoor installs.

Designed for those who think on a larger scale, PROTEUS ATLAS delivers power, precision, and creative freedom, letting audiences look up and experience the extraordinary.
