

SPL-110

MULTI-PURPOSE TELESCOPING SPEAKER STAND

The **Avante Audio SPL-100** is a flat-base speaker stand package designed for stability, strength, and portability. Constructed from durable steel, it safely supports speakers up to 50 lbs (22 kg). The system includes a telescoping M20-mounted pole and a heavy-duty steel base plate, each with its own carry bag for easy transport. Featuring dual M20 mounting points, a convenient handle cutout, and a low-profile design, the SPL110 delivers professional-grade support ideal for live sound, event production, mobile entertainers, and fixed installations.

- Material: Steel
- Base Thickness: .25 inches / 6.3 mm alone;
with plastic feet 1.5 inches / 38mm
- Pole Thickness: 1.75" / 44mm (Outer Pole);
1.375" / 35mm (Inner Pole)
- Pole Length: 54" / 1372mm (Collapsed);
92" / 2337mm (Tallest)
- Base Plate Size (LxWxH): 22.25" x 22.25" x 1.5" /
565x565x38mm
- Max Weight Limit: 60 lbs. / 27kgs.
- Special Features: 2x M20 threaded holes on base for pole,
handle cut out, carry bag for base & pole included

**SUPERIOR STABILITY & SAFETY:**

- Flat steel base provides enhanced balance versus tripod stands
- Ideal for high-traffic event environments
- Durable steel construction ensures long-term reliability

VERSATILE MULTI-PURPOSE DEPLOYMENT:

- Telescoping mounting pole with universal fit for speakers with cup-style pole mounts
- Dual M20 mounting points allow simultaneous speaker and lighting use
- Supports powered or passive loudspeakers

ADJUSTABLE HEIGHT FLEXIBILITY:

- Height range: 54" – 92" (137 – 234 cm)
- Provides optimal sound dispersion for various venue sizes

PORTABLE & EVENT-READY DESIGN:

- Separate carry bags for base and pole
- Built-in handle cutout for easier load-in and transport
- Modular design for convenient storage
